

Product sheet

EMDX³ WITH NETATMO LEGRAND

Connected electricity meter EMDX³ with Netatmo - 100-240V~ supplied with 1 closed current transformer 80A - 1 module

REF. 412015 | EAN. 3414972330787

[> Visit e-catalogue](#)

Product characteristics

- Current transformer equipped with a specific clip to easily associate it to the module
- Track the daily/weekly/monthly/annual history of the total consumption of the house or a circuit with which it is associated (in kWh and as a value)
- Send smart notification related to the energy consumption such as : threshold achieved, «critical» or «urgent»
- Keep constantly up-to-date with the consumption of your appliance and remotely remote-control it from your smartphone wherever you are within the Home + Control app.
- Several Connected Energy Meter can be installed in the same installation

Recommendation / Restriction

- Requires beforehand the installation of a "With Netatmo" gateway such as for example the Control module, the Power-outlet gateway, etc... When working on electricity for your safety turn-off the main protection device in the electrical panel-board.
